2018-FEFO-01084	08/23/2018	We're trying to document flood damages in Vermont and New York from high Lake Champlain levels between April 13, 2011 and June 19, 2011. We believe these are captured in three disaster declarations, DR4001, DR1995, and DR4043. We're looking for information in three categories: • Public Assistance Grant Project Worksheets - Detailed information on costs to restore and repair the public infrastructure to its original state after the 2011 floods. This includes funds to mitigate damage from future disasters. For example, if a culvert was washed out during the 2011 flooding, did FEMA pay to install a larger culvert to withstand higher discharges? • Individual Assistance Grants - Information related to damages to private property, aggregated to census tract or, if that does not protect individual data, zip code. • NFIP Claims Data Detailed damage profiles for individuals properties insured under the federal flood insurance program (NFIP). We understand that sensitive information such as policy numbers, names, and physical addresses would be redacted from these data, but if they can be grouped by census tract or zip code, as discussed above, the location information should help us validate our models.	-

2019-FEFO-00050	10/17/2018	All calendars or calendar entries for any of the following individuals, including any calendars maintained on behalf of these individuals (e.g., by an administrative assistant): • Brock Long • Daniel Kaniewski • Eric Heighberger For these individuals, American Oversight requests that the calendars be produced in a format that includes all invitees, any notes, and all attachments. Please provide all responsive records from the date each custodian joined FEMA through the date the search is conducted. Please do not limit your search to Outlook calendars. We request the production of any document—paper or electronic, whether on government-issued or personal devices—used to track or coordinate how these individuals allocate their time on agency business. In addition to the records requested above, American Oversight also requests records describing the processing of this request, including records sufficient to identify search terms used and locations and custodians searched and any tracking sheets used to track the processing of this request. If your agency uses FOIA questionnaires or certifications completed by individual custodians or components to determine whether they possess responsive materials or to describe how they conducted searches, we also request any such records prepared in connection with the processing of this request.	-

2019-FEFO-00162	12/10/2018	request to obtain all hydraulic models collected and stored by FEMA for the US (including the continental US, Alaska and Hawaii). These hydraulic models are used in the preparation of flood maps for the National Flood Insurance Program. I have heard of other groups who have requested these models and the total directory file size is large (>6TB). As such, I would be willing to provide a hard drive or multiple hard drives for the data to be copied onto. As far as I have been able to discern, these hydraulic models are not available online but if there were a way to obtain them via download, that would be preferable.
